

VINAY B

AI-Native Platform Engineer | Senior SRE

vinaybkrishna10@gmail.com · +91 8660953284 · Bengaluru, India · github.com/Vinaycicdops · linkedin.com/in/vinaybkrishna

PROFESSIONAL SUMMARY

Production-focused SRE with 3.5+ years experience building self-healing Kubernetes platforms on AWS (99.99% uptime, 25k+ RPS). Expert in combining SRE principles with AI/ML systems to build autonomous engineering infrastructure and developer self-service platforms. Specialized in EKS at scale, GitOps, and AI-driven observability.

TECHNICAL SKILLS

Platform & SRE	AWS (EKS, EC2, RDS, VPC, IAM), Terraform, Kubernetes, Helm, ArgoCD, Istio, GitOps.
AI & Ops	AIOps (Anomaly Detection), MLOps (Kubeflow, MLflow), Data Drift Monitoring (Evidently AI).
Observability	Prometheus, Grafana, Loki, ELK Stack, OpenTelemetry.
Security & CI/CD	GitHub Actions, GitLab CI, DevSecOps, Trivy, SonarQube, Infracost.

PROFESSIONAL EXPERIENCE

Senior DevOps & Platform Engineer | Volt Security Pvt Ltd Dec 2023 – Jan 2026

- Administered mission-critical production EKS clusters handling 25k+ RPS with 99.99% uptime across 8 microservices.
- Built a Developer Self-Service Platform using Helm and GitHub Actions, reducing infrastructure provisioning time from days to under 10 minutes.
- Implemented a full observability stack (Prometheus, Grafana, Loki) reducing MTTR by 40% through automated alerting and log correlation.
- Reduced cloud spend by 20% through automated rightsizing and proactive cost visibility using Infracost and custom reporting.

DevOps Engineer | Cognitive Clouds Jan 2021 – Aug 2022

- Engineered multi-stage Dockerfiles reducing image sizes by 60% and optimizing build-to-deploy cycles.
- Built CI/CD pipelines with GitHub Actions and GitLab CI, reducing release cycle time by 20% for 5+ engineering teams.

INDEPENDENT PROJECT

Autonomous AIOps + MLOps Platform

github.com/Vinaycicdops/project_1

- Built a self-healing engine using Isolation Forest and LSTM Autoencoders to monitor 8+ Prometheus metrics with dual-model consensus.
- Designed an end-to-end MLOps pipeline using Kubeflow (KFP v2) with automated retraining triggered by data drift signals (PSI/KS-test).
- Fully declarative infrastructure-as-code deployment with zero-to-production automation.

EDUCATION

B.E. Computer Science — KSSEM, Bengaluru 2015 – 2019
