

VINAY B

DevOps Engineer | Platform Engineering | SRE | MLOps | AIOps

vinaybkrishna10@gmail.com · +91 8660953284 · Bengaluru, India · github.com/Vinaycicdops · linkedin.com/in/vinaybkrishna

PROFESSIONAL SUMMARY

Early-career SRE with 3.5+ years of production experience and a profound eagerness to scale high-performance systems. Expert in building foundational observability (ELK, Prometheus) and automating multi-cloud Kubernetes environments (GCP/AWS). Proven ability to reduce toil through scripting (Python/Bash) and maintain rock-solid reliability (99.99% uptime) in high-concurrency environments (25k+ RPS). Passionate about continuous improvement through blameless post-mortems and proactive resiliency testing.

TECHNICAL SKILLS

SRE & Linux	Linux System Administration, High-Performance Systems, Troubleshooting, Post-mortems
Kubernetes & Cloud	GKE, EKS, GCP (Compute Engine, GKE, Monitoring), AWS, Docker, Helm, ArgoCD
Monitoring & Metrics	Prometheus, Grafana, ELK Stack, Loki, Stackdriver, Splunk, OpenTelemetry
Automation & Scripting	Python (Advanced), Bash, Terraform, Ansible, GitHub Actions, GitLab CI, Jenkins
Networking	TCP/IP, HTTP, DNS, Wireshark, VLANs, Routing
Security	CodeQL, Trivy, SonarQube, Infracost, IAM, KMS

PROFESSIONAL EXPERIENCE

DevOps Engineer | Volt Security Pvt Ltd - Bengaluru, India Dec 2023 – Jan 2026

- Administered production Kubernetes clusters (EKS/GKE) achieving **99.99%** uptime across critical microservices handling **25k+ requests per second**.
- Foundational Observability:** Built and maintained monitoring and alerting for key services using Prometheus, Grafana, and ELK; collaborated with product teams to drive continuous reliability improvements.
- Reduced MTTR to **under 55 minutes** through detailed analysis of system performance metrics and proactive troubleshooting.
- Automated highly available cloud infrastructure with Terraform and Ansible — reduced toil by cutting provisioning time from days to **under 10 minutes**.
- Contributed to systems resiliency testing and DR (Disaster Recovery) readiness for production environments.
- Assisted in the migration of mission-critical applications to modern cloud-native architectures.

Software Engineer | Cognitive Clouds - Bengaluru, India Jan 2021 – Aug 2022

- Engineered automated CI/CD pipelines with GitHub Actions and GitLab CI, **reducing release cycle time by 20%**.
- Managed deployment workflows in an **Agile environment**, ensuring stable production service delivery.
- Gained deep knowledge of Linux-based systems and containerization (Docker) to optimize build and release velocity.

INDEPENDENT PROJECT

Dual-Engine MLOps + AIOps Platform Jan 2024 – Present

github.com/Vinaycicdops/project_1

- AIOps Engine: **Ensemble anomaly detector (Isolation Forest + LSTM Autoencoder)** monitoring 8+ metrics — built out of a curious mindset to proactively detect business-impacting incidents.
- MLOps Pipeline: **6-component KFP v2 workflow** with MLflow tracking; demonstrated ability to write and maintain complex automation tools.
- Reliability Loop: Integrated drift monitoring and automated retraining to improve engineering velocity and system self-healing.

EDUCATION

B.E. Computer Science — KSSEM, Bengaluru 2015 – 2019
