

VINAY B

DevOps Engineer | Platform Engineering | SRE | MLOps | AIOps

vinaybkrishna10@gmail.com · +91 8660953284 · Bengaluru, India · github.com/Vinaycicdops · linkedin.com/in/vinaybkrishna

PROFESSIONAL SUMMARY

SRE & AIOps Engineer with 3.5+ years of experience designing **intelligent, self-healing platforms** for large-scale distributed systems. Expert in integrating **GenAI and AIOps** tools to automate incident detection, root cause analysis, and resolution workflows. Proven track record of building predictive monitoring systems (Isolation Forest + LSTM) that maintain **99.99% uptime** for clusters handling **25k+ RPS**. Skilled in Python, prompt engineering for observability, and architecting cloud-native SRE solutions on AWS/GCP.

TECHNICAL SKILLS

AIOps & GenAI	Intelligent Runbooks, Self-healing Workflows, Predictive Analytics, Prompt Engineering for Observability, AWS Bedrock, Vertex AI
Machine Learning	Isolation Forest, LSTM Autoencoders, Kubeflow Pipelines (KFP v2), MLflow, DVC, Evidently AI, SageMaker
SRE & Observability	Prometheus, Grafana, ELK Stack, Loki, Datadog, BigPanda, Dynatrace, SLI/SLO Design
Cloud & Kubernetes	AWS, GCP, EKS, GKE, Helm, Kustomize, ArgoCD, Terraform, Ansible
Programming	Python (Expert), Bash, Go, Object Oriented Programming (OOP)
Security	CodeQL, Trivy, SonarQube, Infracost, IAM, KMS

PROFESSIONAL EXPERIENCE

DevOps Engineer | Volt Security Pvt Ltd - Bengaluru, India Dec 2023 – Jan 2026

- Administered production EKS clusters achieving **99.99% uptime** across 8 critical microservices handling **millions of daily transactions (25k+ RPS)**.
- AIOps & Intelligent Automation:** Designed and implemented self-healing scripts and intelligent runbooks that reduced manual toil and accelerated response times; achieved **MTTR under 55 minutes**.
- Developed and trained **machine learning models** using operational telemetry (logs, metrics, events) to support predictive analytics and proactive remediation.
- Managed capacity and performance for global infrastructure, implementing standards for system architecture, metrics, and deployment.
- Leveraged **AI-native tooling** to accelerate root-cause analysis and operational efficiency across distributed environments.
- Consistent **20% cloud cost reduction** through automated configuration analysis and rightsizing.

Software Engineer | Cognitive Clouds - Bengaluru, India Jan 2021 – Aug 2022

- Engineered automated CI/CD pipelines with GitHub Actions, **reducing release cycle time by 20%**.
- Improved application delivery efficiency through process refinement, post-mortem reviews, and in-depth configuration analysis.
- Managed build and deployment lifecycles for containerized services in an **Agile environment**.

INDEPENDENT PROJECT

Dual-Engine MLOps + AIOps Platform Jan 2024 – Present

github.com/Vinaycicdops/project_1

- Built an ensemble anomaly detector (Isolation Forest + LSTM) monitoring 8+ production metrics; **detects anomalies within 30–40 seconds**.
- Integrated Evidently AI for drift detection with FastAPI webhooks to auto-trigger **Kubeflow Pipeline retraining**, enabling preemptive remediation.
- Evaluated and deployed AIOps frameworks to enhance observability and reduce noise in high-traffic production systems.

EDUCATION

B.E. Computer Science — KSSEM, Bengaluru 2015 – 2019
