

VINAY B

DevOps Engineer | Platform Engineering | SRE | MLOps | AIOps

vinaybkrishna10@gmail.com · +91 8660953284 · Bengaluru, India · github.com/Vinaycicdops · linkedin.com/in/vinaybkrishna

PROFESSIONAL SUMMARY

SRE & Data Operations Engineer with 3.5+ years of experience ensuring the availability, performance, and reliability of large-scale, cloud-hosted distributed systems. Specialized in ****OpenSearch/Elasticsearch (ELK Stack)****, managing high-concurrency production clusters across multi-cloud environments (AWS, Azure, GCP). Proven track record of maintaining ****99.99% uptime**** at ****25k+ RPS**** and automating complex cluster lifecycle operations to reduce manual toil and improve operational efficiency.

TECHNICAL SKILLS

Data Systems	OpenSearch, Elasticsearch, Logstash, Kibana (ELK Stack), Distributed Systems internals
Cloud & Platforms	AWS, Azure, GCP, EKS, GKE, Kubernetes, Docker
Automation & IaC	Terraform, Ansible, Python, Bash, GitHub Actions, GitLab CI, Git
Observability	Prometheus, Grafana, Loki, OpenTelemetry, SLI/SLO Design
OS & Networking	Linux (Expert), TCP/IP, DNS, ALB/NLB, Security Groups
Security	CodeQL, Trivy, SonarQube, Infracost, IAM, KMS

PROFESSIONAL EXPERIENCE

DevOps Engineer | Volt Security Pvt Ltd - Bengaluru, India Dec 2023 – Jan 2026

- Provided end-to-end operational support for production Kubernetes (EKS/GKE) and **ELK Stack** clusters, ensuring **99.99% uptime** for critical microservices.
- Data Infrastructure Reliability:** Monitored, benchmarked, and tuned **Elasticsearch/OpenSearch** performance; optimized indexing and search latency for clusters handling **25k+ requests per second**.
- Automated cluster lifecycle operations including upgrades, migrations, and scaling using **Terraform and Ansible** — reduced manual toil and environment setup time to **under 10 minutes**.
- Defined and implemented comprehensive SLIs/SLOs for distributed systems; reduced **MTTR to under 55 minutes** through proactive incident response and in-depth configuration analysis.
- Consistently **reduced cloud costs by 20%** through intelligent resource management and infrastructure rightsizing on public cloud platforms.
- Collaborated with engineering teams to diagnose and resolve complex production issues related to data availability and system behavior.

Software Engineer | Cognitive Clouds - Bengaluru, India Jan 2021 – Aug 2022

- Engineered automated CI/CD pipelines with GitHub Actions, **reducing release cycle time by 20%**.
- Gained deep expertise in **Linux system administration** and containerization (Docker) to optimize build speeds and deployment reliability.
- Managed version control and deployment workflows in an **Agile environment** to ensure seamless production releases.

INDEPENDENT PROJECT

Dual-Engine MLOps + AIOps Platform Jan 2024 – Present
github.com/Vinaycicdops/project_1

- Built a predictive monitoring engine (Isolation Forest + LSTM) for distributed system telemetry; **detects anomalies within 30–40 seconds**.
- Automated complex **6-component KFP v2 workflows** with drift detection and auto-retraining loops.
- Infrastructure: Fully declarative metrics config via YAML — **zero-toil monitoring** of new distributed system metrics.

EDUCATION

B.E. Computer Science — KSSEM, Bengaluru 2015 – 2019
